If you enjoy designing as well as building and you are curious and enthusiastic about it, here is the perfect place for you.

Our experienced associate professors teach you in a very practical way and you will learn about the main focuses of interior and object design from the first sketches up to project management. As a certified interior designer and designer of objects you will be responsible for various operations from middle-grade to upscale management in a company, office or public agency.

You

- create and construct Interiors and Design objects
- advise in practical aspects of the entire spectrum of building material
- use supply products of building industry professionally
- run your own business independently, customer- and business economically oriented
- coordinate your work with other trades
- calculate prices, develop directories of services
- plan work schedules, arrange them and establish employment positions
- develop competences to direct your staff
- plan, control and optimize operating sequences, quality of products as well as
- planning- and manufacturing processes
- present ideas and work results, effectively in advertising and convincingly
- The education at the private technical academy will shorten your following university studies.

Our Program

- small education groups
- individual and personal mentoring
- state-of-the-art high level equipment
- interdisciplinary intensification during excursions, exhibition visits and workshops
- school access beyond classes
- extraordinarily well-equipped library
- short but intense duration of study course (2 years)
- free attendance
- affordable rents and living expenses in Cham
- attractive leisure and cultural facilities in and around Cham

Our goal is your success!
